Timely Access REQUIREMENTS

STANDARDS INCLUDE:

VCHCP adheres to patient care access and availability standards as required by the Department of Managed Health Care (DMHC). The DMHC implemented these standards to ensure that members can get an appointment for care on a timely basis, can reach a provider over the phone and can access interpreter services, if needed. Contracted providers are expected to comply with these appointments, telephone access, practitioner availability and linguistic service standards.

VENTURA COUNTY HEALTH CARE PLAN’S Referral & Prior Authorization Process and Services Requiring Prior Authorization

Need information on how and when to obtain referrals and authorization for specific services? Please visit our website at www.vchealthcareplan.org, click on “For Members”, then click on “Referrals and Prior Authorization”. This area provides links for members to obtain specific information on the Plan’s prior authorization process, what services require prior authorization, timelines, and direct referral information.

IF YOU HAVE ANY QUESTIONS, PLEASE CALL MEMBER SERVICES AT (805) 981-5050.

2020 Affirmative Statement Regarding Utilization-Related Incentive*

- Utilization Management (UM) decision making is based only on appropriateness of care and service and existence of coverage.
- The organization does not specifically reward practitioners or other individuals for issuing denials of coverage or care.
- Financial incentives for UM decision makers do not encourage decisions that may result in underutilization.
- VCHCP does not use incentives to encourage barriers to care and service.
- VCHCP does not make hiring, promotion or termination decisions based upon the likelihood or perceived likelihood that an individual will support or tend to support the denial of benefits.

*Includes the following associates: Medical and Clinical Directors, Physicians, UM Directors and Managers, licensed UM staff including Management personnel who supervise clinical staff and any associate in any working capacity that may come in contact with members during their care continuum.

Did you know?

DIRECT SPECIALTY REFERRAL
- Did you know that the direct specialty referral allows your Primary Care Doctor to directly refer you to certain contracted specialty doctors for an initial consult and appropriate follow up visits without requiring a Treatment Authorization Request (TAR) submission and prior authorization from the Health Plan?
- Did you know that specialists can perform certain procedures during your initial consultation and follow up visits without prior authorization from the Health Plan? Also, any follow up visits will not require prior authorization if you were seen by the specialist within a rolling year and your visit is for the original problem.
- Did you know that the Plan’s Medical Director reviews all pended and denial letters/determinations for appropriateness prior to sending to you and your doctors?

45 DAY PEND REVIEW PROCESS
- Did you know that Utilization Management Department’s RN Intake place phone calls or send messages to your doctor if additional information is needed from your doctor?
- Did you know that the Plan’s Medical Director reviews all pended and denial letters/determinations for appropriateness prior to sending to you and your doctors?

2020 Affirmative Statement Regarding Utilization-Related Incentive*

- Utilization Management (UM) decision making is based only on appropriateness of care and service and existence of coverage.
- The organization does not specifically reward practitioners or other individuals for issuing denials of coverage or care.
- Financial incentives for UM decision makers do not encourage decisions that may result in underutilization.
- VCHCP does not use incentives to encourage barriers to care and service.
- VCHCP does not make hiring, promotion or termination decisions based upon the likelihood or perceived likelihood that an individual will support or tend to support the denial of benefits.

*Includes the following associates: Medical and Clinical Directors, Physicians, UM Directors and Managers, licensed UM staff including Management personnel who supervise clinical staff and any associate in any working capacity that may come in contact with members during their care continuum.
Teladoc® gives you 24/7/365 access to U.S. board-certified doctors through the convenience of phone, video or mobile app visits. It’s an affordable alternative to costly urgent care and ER visits when you need care now.

MEET OUR DOCTORS
Teladoc is simply a new way to access qualified doctors. All Teladoc doctors:
• Are practicing PCPs, pediatricians, and family medicine physicians
• Average 20 years experience
• Are U.S. board-certified and licensed in your state
• Are credentialed every three years, meeting NCQA standards

GET THE CARE YOU NEED
Teladoc doctors can treat many medical conditions, including:
• Cold & flu symptoms
• Allergies
• Sinus problems
• Sore Throat
• Respiratory infection
• Skin problems
• And more!

WHEN CAN I USE TELADOC?
Teladoc does not replace your primary physician: it is a convenient and affordable option for quality care.
• When you need care now
• If you’re considering the ER or urgent care for a non-emergency issue
• On vacation, on a business trip, or away from home
• For short term prescription refills

Visit Teladoc.com or call 1-800-TELADOC (835-2362)

Growing Up with Vaccines: What Should Parents Know?

Why Vaccinate?

On-time vaccination throughout childhood is essential because it helps provide immunity before children are exposed to potentially life-threatening diseases. Vaccines are tested to ensure that they are safe and effective for children to receive at the recommended ages.

Pregnancy

By staying up to date with vaccines before and during pregnancy, you can pass along immunity that will help protect your baby from some diseases during the first few months after birth.

Vaccines given before pregnancy may also help protect you from serious disease while you are pregnant, including rubella, which can cause miscarriages and birth defects.

Recommended vaccines:

- Measles, mumps, rubella (MMR) vaccine: At least a month before becoming pregnant
- Tetanus, diphtheria, and pertussis (Tdap) vaccine: During the third trimester of every pregnancy
- Yearly seasonal flu vaccine: By the end of October, if possible

Infant and Toddler Years: Birth to Age 2

Vaccination helps give infants and toddlers a healthy start.

More than one dose is necessary for many vaccines, to build and boost immunity.

Because influenza viruses are constantly changing and the body’s immune response declines over time, everyone over the age of 6 months needs a flu shot every year.

Recommended vaccines:

- Chickenpox (varicella) vaccine: At 12 through 15 months
- Diphtheria, tetanus, and pertussis (DTaP) vaccine: At 2 months, 4 months, 6 months, and 15 through 18 months
- Flu vaccine: Every year by the end of October, if possible, starting at 6 months
- Haemophilus influenzae type b (Hib) vaccine: At 2 months, 4 months, 6 months (if needed; depends on brand), and 12 through 15 months
- Hepatitis A vaccine: At 12 through 23 months and a second dose 6 months following first dose
- Hepatitis B vaccine: Shortly after birth, at 1 through 2 months, and at 6 through 18 months
- Measles, mumps, rubella (MMR) vaccine: At 12 through 15 months; however, infants 6 through 11 months old should have one dose of MMR vaccine before traveling abroad
- Pneumococcal (PCV13) vaccine: At 2 months, 4 months, 6 months, and 12 through 15 months
- Polio (IPV) vaccine: At 2 months, 4 months, and 6 through 18 months
- Rotavirus (RV) vaccine: At 2 months and 4 months (for Rotarix brand); or 2 months, 4 months, and 6 months (for Rotarix brand)
Preschool and Elementary School Years: Ages 3 through 10

Your child needs additional doses of some vaccines from ages 3 through 6.

You may need a certificate of immunization to enroll your child in school.

Recommended vaccines:
- Chickenpox (varicella) vaccine: At 4 through 6 years
- Diphtheria, tetanus, and pertussis (DTaP) vaccine: At 4 through 6 years
- Flu vaccine: Every year by the end of October, if possible
- Measles, mumps, rubella (MMR) vaccine: At 4 through 6 years
- Polio (IPV) vaccine: At 4 through 6 years

Preteen and Teen Years: Ages 11 through 18

As protection from childhood vaccines wears off, adolescents need additional vaccines to extend protection.

Adolescents need protection from additional infections as well, before the risk of exposure increases.

As your child heads to college, make sure all vaccinations are up to date and he or she has a copy of all immunization records.

If your child travels outside of the United States, check if he or she needs any additional vaccines.

Recommended vaccines:
- Flu vaccine: Every year by the end of October, if possible
- Human papillomavirus (HPV) vaccine: At 11 through 12 years and a second dose 6-12 months following the first dose
- Meningococcal conjugate vaccine: At 11 through 12 years and at 16 years
- Serogroup B meningococcal vaccine: May be given at 16 through 23 years; if interested, talk to your child's doctor
- Tetanus, diphtheria, and pertussis (Tdap) vaccine: At 11 through 12 years

Into Adulthood

Everyone should get a flu vaccine every year before the end of October, if possible.

Adults need a Td vaccine every ten years.

Healthy adults 50 years and older should get shingles vaccine.

Adults 65 years or older need one dose of pneumococcal conjugate vaccine followed by one dose of pneumococcal polysaccharide vaccine.

Adults younger than 65 years who have certain health conditions like heart disease, diabetes, cancer, or HIV should also get one or both of these vaccines.

Adults may need other vaccines based on health conditions, job, lifestyle, or travel habits.
More About Childhood & Adolescent Vaccines

**Chickenpox (varicella) vaccine**

Varicella vaccine protects against chickenpox, which can be serious and even life-threatening, especially in babies, adults, and people with weakened immune systems. Symptoms include tiredness, a fever, and an itchy rash of blisters.

**Diphtheria, tetanus, and pertussis (DTaP) vaccine**

DTaP vaccine protects against three serious diseases:

- Diphtheria is a serious infection that causes a thick covering in the back of the nose or throat. It can lead to difficulty breathing, heart failure, paralysis, and even death.
- Tetanus is a potentially deadly infection that causes painful muscle stiffness and lockjaw.
- Whooping cough, or pertussis, is a highly contagious disease known for uncontrollable, violent coughing that often makes it hard to breathe. It can be deadly for babies.

**Flu vaccine**

Seasonal flu vaccine protects against flu, a potentially serious, contagious respiratory illness caused by influenza viruses. Changes in immune, heart, and lung functions during pregnancy make pregnant women more likely to get seriously ill from the flu. The flu may also increase the chances that the developing baby will have serious problems. Everyone 6 months and older should get a flu vaccine every year by the end of October, if possible.

**Haemophilus influenzae type b (Hib) vaccine**

Hib vaccine protects against Hib disease, which ranges from mild ear infections to serious bloodstream infections, pneumonia (infection in the lungs), and meningitis (infection of the covering around the brain and spinal cord). Hib disease can cause brain damage, hearing loss, or even death.

**Hepatitis A vaccine**

Hepatitis A vaccine protects against a serious, contagious liver disease caused by the hepatitis A virus. Symptoms can include fever, loss of appetite, tiredness, stomach pain, vomiting, dark urine, and yellow skin and eyes. Infected children may not have symptoms, but may still pass the disease to others.

**Hepatitis B vaccine**

Hepatitis B vaccine protects against hepatitis B, a virus that can cause chronic swelling of the liver and possible lifelong complications. Nine out of 10 infants who contract hepatitis B from their mothers become chronically infected.

**Human papillomavirus (HPV) vaccine**

HPV vaccine protects against a common infection that can cause certain cancers in men and women. While most HPV infections go away on their own, infections that don’t go away can cause:

- cancers of the cervix, vagina, and vulva in women;
- cancers of the penis in men;
- and cancers of the anus and back of the throat (oropharynx) in men and women.

Some HPV infections can also cause genital warts.

**Measles, mumps, rubella (MMR) vaccine**

Measles, mumps, rubella (MMR) vaccine protects against three serious diseases:

- The measles virus can cause a fever that can get very high, a distinctive rash, cough, runny nose, and red eyes. Sometimes, it can also cause diarrhea and ear infection. It can also lead to pneumonia (infection in the lungs), brain damage, deafness, and death.
- Mumps typically starts with a fever, headache, muscle aches, tiredness, and loss of appetite. Then, most people’s salivary glands swell, which causes puffy cheeks and a swollen jaw. Mumps is pretty mild in most people but can sometimes cause lasting problems, such as deafness, meningitis (infection of the covering around the brain and spinal cord), and swelling of the brain, testicles, ovaries, or breasts.
- Rubella may cause a rash or fever, but many people have no symptoms. Rubella can cause miscarriage or serious birth defects in a developing baby if a woman is infected while she is pregnant. Infected children can spread rubella to pregnant women.

**Meningococcal conjugate vaccine**

Meningococcal conjugate vaccine protects against some types of meningococcal bacteria, which can cause serious and even deadly infections, including meningitis (infection of the covering around the brain and spinal cord) and bloodstream infections.

**Pneumococcal conjugate vaccine (PCV13) and pneumococcal polysaccharide vaccine (PPSV23)**

PCV13 protects against 13 strains of pneumococcal bacteria and PPSV23 protects against 23 strains of pneumococcal bacteria. Both vaccines provide protection against illnesses like meningitis and bacteremia. PCV13 also provides protection against pneumonia. Talk to your doctor and child’s doctor about which vaccines they recommend.

**Polio (IPV) vaccine**

IPV vaccine protects against polio, a highly infectious disease caused by a virus that can invade the brain and spinal cord. Polio can cause lifelong paralysis and even death.

**Rotavirus (RV) vaccine**

RV vaccine protects against a contagious virus that causes severe diarrhea, often with vomiting, fever, and abdominal pain, requiring hospitalization. It is most common in infants and young children. Adults who get rotavirus tend to have milder symptoms.

**Serogroup B meningococcal vaccine**

Serogroup B meningococcal vaccine protects against one type of meningococcal bacteria, which can cause serious and even deadly infections, including meningitis (infection of the covering around the brain and spinal cord) and bloodstream infections.

**Tetanus, diphtheria, and pertussis (Tdap) vaccine**

Tdap vaccine is a booster vaccine that protects older children and adults from tetanus, diphtheria, and pertussis (whooping cough). When you get Tdap vaccine during pregnancy, your body will create protective antibodies against whooping cough and pass some of them to your baby before birth, providing some short-term, early protection.

Last updated JULY 2018
What is 2019 novel coronavirus?
The 2019 novel coronavirus (2019-nCoV) is a new virus that causes respiratory illness in people and can spread from person to person. This virus was first identified during an investigation into an outbreak in Wuhan, China.

Can people in the U.S. get 2019-nCoV?
The 2019-nCoV is spreading from person to person in China and limited spread among close contacts has been detected in some countries outside China, including the United States. At this time, however, this virus is NOT currently spreading in communities in the United States. Right now, the greatest risk of infection is for people in China or people who have traveled to China. Risk of infection is dependent on exposure. Close contacts of people who are infected are at greater risk of exposure, for example health care workers and close contacts of people who are infected with 2019-nCoV. CDC continues to closely monitor the situation.

Have there been cases of 2019-nCoV in the U.S.?

How does 2019-nCoV spread?
This virus probably originally emerged from an animal source but now seems to be spreading from person to person. It’s important to note that person-to-person spread can happen on a continuum. Some viruses are highly contagious (like measles), while other viruses are less so. At this time, it’s unclear how easily or sustainably this virus is spreading between people. Learn what is known about the spread of newly emerged coronaviruses at https://www.cdc.gov/coronavirus/2019-ncov/about/transmission.html.

What are the symptoms of 2019-nCoV?
Patients with 2019-nCoV have reportedly had mild to severe respiratory illness with symptoms of
• fever
• cough
• shortness of breath

What are severe complications from this virus?
Many patients have pneumonia in both lungs.

How can I help protect myself?
The best way to prevent infection is to avoid being exposed to this virus.

There are simple everyday preventive actions to help prevent the spread of respiratory viruses. These include
• Avoid close contact with people who are sick.
• Avoid touching your eyes, nose, and mouth with unwashed hands.
• Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.

If you are sick, to keep from spreading respiratory illness to others, you should
• Stay home when you are sick.
• Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
• Clean and disinfect frequently touched objects and surfaces.

What should I do if I recently traveled to China and got sick?
If you were in China within the past 14 days and feel sick with fever, cough, or difficulty breathing, you should seek medical care. Call the office of your health care provider before you go and tell them about your travel and your symptoms. They will give you instructions on how to get care without exposing other people to your illness. While sick, avoid contact with people, don’t go out and delay any travel to reduce the possibility of spreading illness to others.

Is there a vaccine?
There is currently no vaccine to protect against 2019-nCoV. The best way to prevent infection is to avoid being exposed to this virus.

Is there a treatment?
There is no specific antiviral treatment for 2019-nCoV. People with 2019-nCov can seek medical care to help relieve symptoms.

For more information: www.cdc.gov/nCoV
Opioids: What you need to know

Opioid dependence and addiction is at an all-time high. Every day, many people die from an opioid overdose.

Have you been using an opioid medication and are experiencing some of the signs of substance use disorder that are listed in this flyer? Have you asked a doctor for more prescription opioids even though you don’t need them anymore? If so, you may be dependent or addicted.

The Substance Use Disorder Helpline’s specially trained recovery advocates can give you information about opioid use. They can also arrange a professional evaluation. They can help you find medication assisted treatment (MAT) options from a provider in your network.

Are you at risk?
Admitting substance use disorder takes courage. Read these statements to see if you may be at risk:
• Do I keep my use a secret from others?
• Are friends, family, or co-workers concerned?
• Do I find any excuse to drink or use?
• Do I use to change the way I’m feeling?
• Is my use increasing?
• Do I make promises to stop or cut back, but never follow through?
• Do I tell myself my problem isn’t that bad?
• Have I ever had a blackout (memory lapse) after using?
• Do I feel regret or shame after using?
• Do I spend more money than I can afford on alcohol or drugs?
• Am I at risk of physical danger or financial loss?
• Do I look forward to using alcohol or drugs?

If you have answered yes to three or more of these questions, you may be at risk for substance use disorder.

For education, guidance and referral, for you or your loved one call the confidential Substance Use Disorder Helpline at 1-855-780-5955.

Helpline recovery advocates understand what you’re going through.

The Optum Substance Use Disorder Helpline, at 1-855-780-5955.

This confidential service is provided at no added cost to you. Your personal information will be kept confidential in accordance with state and federal laws.

Call the number above or visit: liveandworkwell.com/recovery

About medication-assisted treatment (MAT)

Most people are able to take prescription opioids for pain without serious problems. But some struggle to use their medication correctly. This can lead to a substance use disorder (SUD). SUD is a brain disease. It causes people to seek a “high” from the medications, no matter what the consequences. Sometimes people who can’t get their prescription medication anymore turn to cheaper opioids like heroin. Heroin addiction affects more than half a million people.

Medications, including buprenorphine, methadone, and extended release naltrexone, are effective for the treatment of opioid use disorders. MAT uses medications that control withdrawal symptoms and cravings that can lead to relapse. Some people may need to stay on these medications for a long time. This gives them time to recover and reduces the dangers of relapse. When medication is combined with counseling and other support, it is very effective. It helps people recover and resume a productive life.
Dealing with substance use disorder can be frightening and overwhelming. Whether you have a loved one who is facing the challenges or you’re worried about your own substance use, you may feel worried and helpless.

You’re not alone. You and millions of others, from all walks of life across the country, are coping with this issue. Some are addicted to alcohol. Some are battling drugs. Either way, substance use disorder is not a sign of weakness. It’s not about being a bad person. It’s a treatable disease. And we’re here to help.

**Recognizing unhealthy drug use in family members**

Sometimes it’s difficult to distinguish normal teenage moodiness or angst from signs of drug use. Possible signs that your teenager or other family member is using drugs include:

- **Problems at school or work** — Frequently missing school or work. A sudden disinterest in school activities or work. Or a drop in grades or work performance.
- **Physical health issues** — Lack of energy and motivation, weight loss or gain, or red eyes.
- **Neglected appearance** — Lack of interest in clothing, grooming or looks.
- **Changes in behavior** — Exaggerated efforts to bar family members from entering his or her room. Being secretive about where he or she goes with friends. Drastic changes in behavior and in relationships with family and friends.
- **Money issues** — Sudden requests for money without a reasonable explanation. Discovering that money is missing or has been stolen. Or that items have disappeared from your home that might be being sold to support drug use.

**Call us. We care.**

The Substance Use Disorder Helpline is staffed with highly trained and licensed recovery advocates. The recovery advocate will talk with you about your concerns and your unique needs. They will educate and guide you or your loved one. The recovery advocate can refer to a substance use disorder treatment professional who will develop a personalized treatment plan. They can also help you with family support.

The Substance Use Disorder Helpline is available at no added cost to you. It is part of your health benefit. You can remain anonymous when you call. Your information will be kept confidential in accordance with state and federal laws.

Optum reserves the right to change specifications without prior notice. Optum is an equal opportunity employer.

Only a treating health care clinician or physician can endorse any treatment or medication, specific or otherwise. This service provides referrals to such a professional, as well as information to help you maintain and enhance your personal health management. This service and information is not meant to replace professional medical advice. Certain treatments may not be included in your insurance benefits. Check your health plan regarding your coverage of services.
VCHCP recognizes that, under certain circumstances, our performance or that of our contracted providers, may not agree with or match our members’ expectations. Therefore, the Plan has established a grievance/complaint and appeal system for the Plan Members to file a grievance. We endeavor to assure our members of their rights to voice complaints and appeals, and to expedite resolutions.

VCHCP encourages the informal resolution of problems and complaints, especially if they resulted from misinformation or misunderstanding. However, if a complaint cannot be resolved in this manner, a formal Member Grievance Procedure is available.

The Member Grievance Procedure is designed to provide a meaningful, dignified and confidential process for the hearing and resolving of problems and complaints. VCHCP makes available complaint forms at its offices and provides complaint forms to each Participating Provider. A Member may initiate a grievance in any form or manner (form, letter, or telephone call to the Member Services Department), and when VCHCP is unable to distinguish between a complaint and an inquiry, the communication shall be considered a complaint that initiates the Member Grievance Procedure.

PROCEDURES
Members may register complaints with VCHCP by calling, writing, or via email or fax:
Ventura County Health Care Plan
2220 E. Gonzales Rd. Ste. 210-B, Oxnard, CA 93036
Phone: (805) 981-5050 Fax: (805) 981-5051
Email: VCHCP.Memberservices@ventura.org

In addition, the Plan’s website provides an on-line form that an enrollee may use to file a grievance on-line. The link to this on-line Grievance Form is found on the right-hand side of the Plan’s web portal page, (www.vchealthcareplan.org).

The Plan shall provide written acknowledgment of a Member’s grievance within five (5) days of receipt. The Plan shall provide a written response to a grievance within thirty (30) days. If, however, the case involves an imminent and serious threat to the health of the Member, including, but not limited to, severe pain, potential loss of life, limb, or major bodily function, the Plan shall provide an expedited review. This also applies to grievances for terminations for non-renewals, rescissions, and cancellations. The Plan shall provide a written statement on the disposition or pending status of a case requiring an expedited review no later than three days from receipt of the grievance.

FOR ANY QUESTIONS, PLEASE CONTACT THE VCHCP Utilization Management Department at (805) 981-5060.

The Ventura County Health Care Plan provides pharmacy coverage through Express Scripts. Members have the ability to create an online Express Scripts profile account at https://www.express-scripts.com/. Members have access to the following services and information once their profile is established.

- Manage Prescriptions – Refill/Renew
- Determine Financial Responsibility for a Drug
- View Recent Orders & Status
- View Prescription History – Ability to Search by RX Number
- View Health and Benefit Information
- View Account Information
- Find the location of an in-network Pharmacy – Ability to Search by Zip-code

If you have any questions or need to reach an Express Scripts Representative, please call (800) 811-0293.
Pharmacy Updates

The following is a list of additions and deletions for the Ventura County Health Care Plan’s formulary recently approved by the Plan’s Pharmacy & Therapeutics Committee. Additional information regarding the High Performance Formulary is available thru Express Scripts (ESI).

Note: The Plan’s Drug Policies, updated Step Therapy and Drug Quantity Limits can also be accessed at: http://www.vchealthcareplan.org/members/programs/countyEmployees.aspx

### Formulary Additions: 3Q-2019

#### New Generics:

For questions or concerns, please call Ventura County Health Care Plan at (805) 981-5050 or (800) 600-8247 or you may also contact Express Scripts directly at (800) 811-0293.
How TEAMWORK Can Help You

Your brain is part of the rest of your body. If you are seeing a mental health specialist and your mental health specialist and medical doctor (Primary Care Physician or PCP) talk, you get better treatment. The way to make this possible is to sign a Confidential Exchange of Information Form and Authorization for Release of Information Form for each one of your providers. If you are seeing a mental health specialist, inform them how to contact your PCP and other healthcare providers. Also your PCP will want to know that you are seeing a mental health specialist.

Some reasons why working together is important:

- You may be getting medicines from your psychiatrist as well as your PCP.
- Some medicines do not work well together.
- Your doctors need to know all the medicines, including non-prescription medicines you are taking.
- Medical problems can cause mental health problems.
- Mental health problems can cause medical problems.

You can find the OptumHealth Behavioral Solutions of California Confidential Exchange of Information Form and Release of Information Form on www.liveandworkwell.com and also available at www.vchealthcareplan.org (click the “Forms” link at the top of any page when logged in). The information your healthcare providers share is private to the fullest extent permitted by law. Your PCP may decide to use their own Release of Information form. If so, make sure it includes the ability to exchange mental health information.

List the names of all your healthcare providers. Share this list with each person you listed and ask them to work together. If you are seeing a PCP, be sure that your PCP is collaborating care with any of your other treating providers including a mental health specialist. Communication is the key for your overall health care.
Emergency Room Visit Copays and Follow Up

No one likes Emergency Room (ER) visits, nor how pricey they can become.

Avoid having to pay multiple ER copays by ensuring that you see your Primary Care Provider (PCP) for any follow-up care. Just a reminder... Additional ER copays will be applied when returning for follow-up care at the ER.

A sudden trip to the ER can be difficult and often times results in a change in medication or treatment. After a visit to the ER, it is very important that you make an appointment to see your PCP and specialist when applicable, as soon as possible, or within 30 days. This visit is to update your PCP on what occurred that required you to seek emergency treatment, update your medication routine, and to be referred for additional care if needed. Establishing and keeping a good relationship with your PCP is vital to your health and your PCP's ability to provide care to you.

If you find that making an appointment with your PCP or specialist after an ER visit is difficult and you can’t be seen within 30 days, or if your ER visit was due to your inability to be seen by your PCP, please notify your Ventura County Health Care Plan Member Services Department at (805) 981-5050. Your ability to access health care is important to us.
Members who are diagnosed with depression and prescribed medication should work closely with their physician to ensure proper treatment. To achieve maximum results from anti-depressant medication, it is important to remain on the medication consistently for at least 6 months, or for the duration prescribed by your physician. VCHCP contracts with Express Scripts for prescription medications. If you have any questions about services you may be in need of, please contact your physician.

The VCHCP Disease Management Program coordinates health care interventions and communication for members with conditions where member self-care can improve their conditions. VCHCP has two Disease Management programs: Asthma and Diabetes. VCHCP has systematic processes in place to proactively identify members who may be appropriate for disease management services. Claims encounter data and pharmacy data are used to systematically identify members for disease management. Members and providers may also refer to the Disease Management program. This program is an automatic enrollment process unless members opt out. The Disease Management team works with doctors and licensed professionals to improve these chronic conditions so members obtain the best possible quality of life and functioning. Included in the Disease Management Program are mailed educational materials, provider education on evidence-based clinical guidelines, member education over the phone (health coaching) and care coordination. VCHCP has a variety of member materials about diabetes and asthma available to help you better understand your condition and manage your chronic disease. Our goal is to improve the health of our members.

VCHCP has a Case Management Program to help our members who have complex needs by ensuring that our members work closely with their doctors to plan their care. The goals of Case Management are to help members get to their best health possible in the right setting; coordinate and manage healthcare resources; support the treatment plan ordered by the doctor; and to take action to improve member overall quality of life and health outcomes. As a member in Case Management, members with complicated health care issues and their family have a truly coordinated plan of care.

VCHCP identifies members for Case Management through a number of referral sources, including health care provider referrals and member self-referrals. Some examples of eligible medical conditions or events include multiple hospital admissions or re-admissions, multiple chronic conditions, major organ transplant candidates, and major trauma. After a nurse Case Manager evaluates a member, the Case Manager creates a care plan with member and healthcare team input. The care plan is shared with the member’s doctor for his/her input and review. The care plan is monitored by the Case Manager and coordinated with the member and doctor.

VCHCP has two programs for members with severe illnesses and chronic diseases to help them plan their care with their primary doctor and learn more about self-care. These programs have nurses who work with members over the phone to guide them towards the best possible health for their conditions.

Participation in these programs is free and voluntary for eligible members. Members can opt out at any time and being in these programs does not affect benefits or eligibility. For more information or to submit a referral for the Disease Management or Case Management Programs, please call (805) 981-5060 or discuss with your doctor. Members can also self-refer to these programs online on the Member page at vchealthcareplan.org and click on the box labeled “Request Case Management or Disease Management”.

Depression is a chronic disease that requires long-term management, typically with medication.

Depression is a common mental illness that can be very limiting. When members are well informed and seek treatment, they can successfully work through life problems, identify coping skills, and retain a sense of control. VCHCP has created a brochure of depression information and resources available to members. This valuable resource is available on the VCHCP website at www.vchealthcareplan.org/members/healthEducationInfo.aspx. If you do not have access to the website, or would like further information please call (805) 981-5060 and ask to speak with a Disease Management Nurse.
NEW TO THE NETWORK!

**Ahn Nguyen, D.P.M.**, a podiatrist at Fillmore Orthopedic Clinic (VCMC) in Fillmore and Sierra Vista Family Medical Clinic (VCMC) in Simi Valley has been added, effective September 2019.

STANDARDS FOR

Members’ Rights & Responsibilities

Ventura County Health Care Plan (VCHCP) is committed to maintaining a mutually respectful relationship with its Members that promotes effective health care. Standards for Members Rights and Responsibilities are as follows:

1. Members have a right to receive information about VCHCP, its services, its Practitioners and Providers, and Members’ Rights and Responsibilities.

2. Members have a right to be treated with respect and recognition of their dignity and right to privacy.

3. Members have a right to participate with Practitioners and Providers in decision making regarding their health care.

4. Members have a right to a candid discussion of treatment alternatives with their Practitioner and Provider regardless of the cost or benefit coverage of the Ventura County Health Care Plan.

5. Members have a right to make recommendations regarding VCHCP’s Member Rights and Responsibility policy.

6. Members have a right to voice complaints or appeals about VCHCP or the care provided.

7. Members have a responsibility to provide, to the extent possible, information that VCHCP and its Practitioners and Providers need in order to care for them.

8. Members have a responsibility to follow the plans and instructions for care that they have agreed upon with their Practitioners and Providers.

9. Members have a responsibility to understand their health problems and participate in developing mutually agreed-upon treatment goals, to the degree possible.

For information regarding the Plan’s privacy practices, please see the “HIPAA Letter and Notice of Privacy Practices” available on our website at: http://www.vchealthcareplan.org/members/memberIndex.aspx. Or you may call the Member Services Department at (805) 981-5050 or toll free at (800) 600-8247 to have a printed copy of this notice mailed to you.
