

Multiple Sleep Latency Test (MSLT) and Maintenance of Wakefulness Test (MWT)

Please check all clinical indications that apply

MSLT or MWT may be indicated for **1 or more** of the following:

- MSLT assessment of suspected narcolepsy and other disorders of excessive daytime sleepiness, as indicated by **1 or more** of the following:
 - Initial test needed, as indicated by **1 or more** of the following:
 - Cataplexy (ie, sudden weakness or loss of muscle tone not accompanied by loss of consciousness)
 - Disturbed or fragmented sleep
 - Excessive daytime sleepiness¹
 - Hallucinations with sleep onset (hypnagogic) or upon awakening (hypnopompic)
 - Sleep paralysis
 - Repeat test needed, as indicated by **1 or more** of the following:
 - Initial MSLT results indeterminate
 - Initial MSLT results negative, but strong clinical suspicion of narcolepsy
- MWT assessment of sleep disorders, as indicated by **1 or more** of the following:
 - Assessment of patient for whom inability to remain awake constitutes safety issue (eg, patient is airplane pilot)
 - Assessment of patient with narcolepsy or idiopathic hypersomnia to assess response to treatment
